

# Smile News

Summer is here and hotter than ever! We have enjoyed seeing lots of little ones this summer and have loved all the vacation stories. Soon our children will be returning to school to begin a new academic year with bright smiles. Don't forget to check out our "no cavity club" to look for your child's picture.

We have been busy making some changes that we learned about at our annual dental meeting in Orlando. We took many informative classes that gave us the latest on treating patients with medical compromised health and how to live health without infection. We also took classes on oral cancer to instruct us on what to look for so that we can help keep you healthy. We learned how we can better assist you with your appoint scheduling needs and make your appointment a lot less stressful.

We are happy to help in any way we can with your scheduling needs and your medical/dental concerns. A very important part of our check in process is gathering your personal information so that we can obtain a better picture of your medical profile to help with treating you dentally. Many medical conditions and medications can directly effect your dental treatment. Help us, help you!

We are very excited for Melanie as she welcomes baby Brooklyn to their growing family. We will miss Melanie and pray the best for her as she starts a new chapter in her life as a full time stay home mommy (the most challenging job)!

**Thank you for trusting us as your dental providers!**
